AVINASH KUMAR K S
avinash.ks.tech@gmail.com | +91-7025053477

Quality Assurance Technician with over **3.5 years of experience** in **test automation, functional testing, and DevOps practices**, currently working at **Amazon Development Center**. Proficient in **Python, Pytest, Selenium, Appium, and SQL**, with hands-on experience in building scalable automation frameworks, debugging complex test failures, and integrating CI/CD pipelines using **Jenkins and Git**. Demonstrated expertise in **JIRA, TestRail, Confluence**, with a proven track record of leading test initiatives, reducing manual efforts, and enhancing product quality. Recognized for innovation and leadership with multiple accolades at Amazon, including **Quarterback Champion** and **Ace of Innovation**.

TECHNICAL SKILLS

- **Programming languages :** Python, SQL , JAVA (basics)
- **Database:** MySQL
- **Software Testing**: Appium, Pytest, Python-Selenium, Jira
- **Testing Methods & Environment:** Confluence,TestRail, KIBANA ,GIT, STLC ,Functional, Regression , Ad-Hoc.

CERTIFICATES

- Software Engineer Certificate (HackerRank)

ACHIEVEMENTS

- **Quarterback Champion, Q3 2023** – Recognized for exceptional performance and leadership in driving key initiatives at Amazon.
- **Top Ideator, Ideathon Q4 2023** – Awarded for submitting 24 valid and innovative ideas that contributed to enhancing team processes and innovation.
- **Ace of Innovation, Amazon** – Honored for excellence in automation, continuous improvement, and leading impactful initiatives that advanced operational efficiency.

WORK EXPERIENCE

Amazon Development Center, Chennai **May 2022 - January 2026**
Quality Assurance Technician

- Designed and maintained automation test cases, managing codebases with version control, ensuring 100% compliance.
- Debugged 100+ failed automation cases, improving system functionality by 40% and reducing failure rates by 30%.
- Automated 200+ test cases, expanding test coverage by 80%, reducing manual efforts by 70%, and improving execution efficiency by 60%.
- Prepared test documentation, including test plans, reports, and SOPs, strengthening test strategies.
- Triaged defects and analyzed logs to identify root causes, resolving 90% of issues within SLAs and escalating 30+ blocker/critical issues, reducing defect backlog by 25%.
- Conducted integration testing deliverables, ensuring 95% defect detection and reducing post-release defects by 30%.
- Collaborated with cross-functional teams, ensuring smooth User Acceptance Testing (UAT) and validating test verification matrices.
- Led a 10-member team, owning the component end-to-end,set up triage, enabled automation for 100+ apps in batches, and gated critical crashes early.
- Built a script to fetch third-party apps and upload to S3, reducing manual effort by 80% and boosting pipeline test readiness.
- Built an AI-assisted image validation system to compare UI outputs with reference images, reducing manual validation effort by 60%+.
- Developed an AI-powered test report analyzer to detect crashes, highlight failures, and suggest possible root causes, reducing debugging time by 40%.
- Leveraged Amazon Q and LLM-based tools to generate test cases, debug automation scripts, and optimize test workflows.
- Designed workflows for AI-driven test case generation from UI inputs, improving test coverage and reducing manual effort.

Amazon Development Center, Coimbatore **August 2020 - May 2022**
Quality Associate

- Handled a high volume of customer chats and calls daily, ensuring quick and accurate support even during peak times.
- Focused on resolving issues on the first interaction, improving customer satisfaction and reducing repeat contacts.
- Recognized with an RNR award for consistent performance, quality, and commitment to customer experience.

PROJECTS

- ***OTA (Over The Air - Update) Testing Framework***
  - Developed a Python-based automated OTA testing framework using Pytest, reducing manual testing efforts by 80% and improving efficiency by 60%.
  - Implemented REST API calls for file uploads, cutting manual time by 80%.
  - Automated functional and regression tests, reducing execution time by 70%.
  - **Tech Stack:** Python, Pytest, REST API, OOP, YAML, JWT Authentication

- ***JIRA Data Collection Tool***
    - Built a Python tool to automate JIRA metrics generation, reducing processing time by 85% (from 1 hour to 15 minutes).
    - Boosted team productivity by 75% and decreased reporting errors by 40%.
    - **Tech Stack:** Python, JIRA, JQL, REST API, YAML, OOP, JWT Authentication

ADDITIONAL SKILLS

- Experience in designing and executing test cases, tracking nonconformance items, and ensuring compliance before production rollout.
- Strong analytical skills for process monitoring, product evaluation, and reporting quality metrics.
- Effective communication and problem-solving abilities, ensuring smooth collaboration across teams.

EDUCATION

Kerala Technical University, India **August 2015 - May 2019**

Bachelors of Technology in Mechanical Engineering CGPA 6.64
